The lighting used for this image of Michael and Gay is a great basic setup that can easily be adjusted to suit the shape of the subjects. If the subject's face is round, for example, you might want to slim it by moving the reflector away from the subject to create more shadow (or you could eliminate the reflector entirely, resulting in

Introduction to photography - Carleton University

Techniques for better photography lighting - direction. The direction the light comes from can make the image seem flat or 3-dimensional. Front lighting is easy to photograph, but images are generally flat. Top lighting, such as from the sun overhead, also makes the image flat, and shadows are short and dark. Side lighting will emphasize
